

SOFTWARE DOCUMENTATION AND ELECTRONIC PERFORMANCE SUPPORT

Epilogue Systems drives effective use of your critical software applications with the easiest, most cost effective tool for the creation of context-sensitive help and performance support guidance for your end users ... as they work in your applications and at their moment of need.

YOUR CHALLENGES

- Documenting your applications is too difficult and costly
- Managing and maintaining the content is a problem
- End user can't get the help they need at their moment of need

OUR ANSWERS

CHALLENGE: Documenting your application(s) is too difficult and costly.

ANSWER: *EPILOGUE AUTHOR* reduces performance support content creation effort by up to 90% and can be used by almost anyone, not just highly skilled content creators.

CHALLENGE: Managing and maintaining the content is a problem.

ANSWER: *EPILOGUE PUBLISHER* is the backbone of Epilogue's EPS platform and overcomes these issues for content volume on any scale.

CHALLENGE: End users can't find the help they need *at the moment of need*.

ANSWER: *EPILOGUE ADVISOR* enables real-time, in-application, context-sensitive performance support to end users in 2-clicks.

OUR BENEFITS

- ✓ Reduce documentation time by 90%
- ✓ Reduce training time by 50%
- ✓ Reduce helpdesk volume by 40%

Just the savings in these areas alone results in an ROI many times the cost of our software on just one project. Used on multiple projects and the ROI becomes dramatic. More importantly, enable your end users to use your systems correctly, productively and compliantly, resulting in better ROI on your major systems.
