## VIP Quick-Learn™: Learning Management System

Virtual Intelligence Providers, LLC (VIP) is a leading, global provider of Organizational Change Management and Corporate Learning. Our solutions are the result of over a decade of research and development guided by our customers' requests, advice and recommendations. Our association and partnership with a variety of higher education institutions also serves as validation and endorsement of the quality of our technological research and our understanding of new generational training patterns and learning acceptance strategies of the 21 Century.

Our State-of-the-Art Solutions are designed to manage both online and instructor-led training, merging the most sophisticated "Blended Learning Concepts" while delivering on-demand and anywhere in the world. Since each organization is significantly different from another we make sure your solution is 100% customized and localized. Our multilingual consulting team is able to deliver Software-as-a-Service (SaaS) in 26 different languages for small and large complex operating environments. Our solutions are available as cloud or local implementations, through direct purchase or annual leasing.

Our mission is to empower and enable our customers to manage their changing instructional design / learning challenges while minimizing cost and maximizing employee performance.

## VIP Quick-Learn™: Learning Cloud Solution delivered as Software-as-a-Service (SaaS)

**OVERVIEW:** VIP's learning solution is an automated Learning Management System designed to improve organizational performance by delivering targeted, customized training of any nature and for any department or vertical within your enterprise.

Our **VIP-OCM** application (Quick-Change™) identifies competencies and skill gaps which are immediately communicated and addressed through VIP Quick-Learn which immediately starts a process of performance improvement and organizational productivity enhancements delivered through VIP's Quick-Learn™.

**Quick-Learn™** provides sophisticated tools to manage your training activity while generating efficiencies and increasing end-user's (Stakeholder's) productivity.
